1. Upon reconsideration, it would appear that the instant invention contains more than just the two species initially submitted to be present. Hence, the earlier restriction has been vacated and replaced with the following.

2. This application contains claims directed to the following patentably distinct species:

Species A, that directed to employing a solid core fiber and removable substrate material (claims 1-22, 81);

Species B, that directed to using a solid core fiber as the removable substrate material (claims 23-45, 82);

Species C, that directed to employing a swellable membrane forming material over the solid core (claims 44-55, 83);

Species D, that directed to employing a solid core fiber and an ion exchange material (claims 56-65, 84);

Species E, that directed to using a solid core fiber and a mixture of membrane forming and pore forming material (claims 66-68, 85); and

Species F, that directed to using the solid core fiber and a mixture of membrane forming material and reinforcing fibers (claims 71 and 86). The species are independent or distinct because they are directed to separate embodiments of the invention that are clearly unrelated and capable of supporting a patent independently.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 76-80 and 87 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mathieu D. Vargot whose telephone number is 571 272-1211. The examiner can normally be reached on Mon-Fri from 9 to 6.
